Introduction

The University of Minnesota's Center for Changing Landscapes (CCL) was directed by the Minnesota Legislature to create a long-range framework for an integrated statewide parks and trails system. The framework considers existing science and information available on the natural resource-based recreation opportunities throughout the state and will guide statewide parks and trail planning into the future. Specifically, the framework will respond to recreation trends and demographic changes, examine underserved areas and overused facilities, and will identify gaps in the current parks and trails system. As such, the framework will establish opportunities to enhance existing assets, develop new assets, and link those assets together effectively. To inform the framework, an inventory of recreation experience opportunities was conducted in each of five regions across the state and is presented in a series of five regional profiles. The regional profiles offer a snapshot of existing recreation demand by examining county, regional and state population, sociodemographic characteristics, and recreation experience opportunity data available from past research and monitoring efforts. The profiles serve as the baseline for an in-depth analysis of current demand and existing recreation supply (e.g., parks and trail system) in light of (1) relative geographic distribution of resources and facilities, (2) future recreation demand projections (e.g., population, sociodemographics, and recreation participation), and (3) proposed or planned enhancements to the parks and trails system across the state. This report presents a profile of recreation experience opportunities in the Northwest Region.

This inventory takes into account several key components of an outdoor recreation opportunity including recreation activities, experiences, and potential constraints. Minnesotans engage in a broad spectrum of activities (e.g., boating or picnicking) in Minnesota's parks and trails and these activities afford recreationists a wide range of individual and social experiences (e.g., solitude or being with family). Understanding and managing for the recreation experiences parks and trails visitors seek and attain is important because high quality experiences can bring about positive psychological outcomes both onsite (e.g., reducing tension) and off-site (e.g., higher productivity at work) for individuals (Driver, 2008). For instance, a 1993 study conducted in six Minnesota State Parks revealed that many recreationists visit parks to experience natural scenery, enjoy the smells and sounds of nature, be with members of their own group, and get away from the usual demands of life (Anderson, 2008). However, in some circumstances these experiences were not fully attained because of the constraints visitors encountered. Some State Park visitors reported problems related to noise, crowding, motorized use, litter, and full campsites. As was confirmed by the State Park study, certain setting attributes or conditions can constrain outdoor recreation opportunities and present problems to visitors. Thus, an integrated parks and trails system must consider both the quality of recreation settings and the quality of recreation experiences visitors have in those settings. More recent studies have shown that parks and trails can also benefit local communities and society (Anderson, Davenport, Leahy, & Stein, 2008). For example, communities can benefit from proximate parks and trails through economic revenue from increased tourism, an enhanced community identity, and higher quality of life for residents. Society benefits from the ecosystem services many recreation and conservation areas provide such as flood control, climate regulation, and air and water purification (Millennium Ecosystem Assessment, 2005).

To inventory recreation experience opportunities and recreation demand across the state, multiple attributes associated with the key components of an outdoor recreation opportunity described above, as well as important population sociodemographic characteristics were selected. These attributes were chosen to embody the range and diversity of recreation opportunities available in the state and Minnesota's diverse population (Appendix 1). To remain current, the recreation experience opportunity component was restricted to published data obtained through research and monitoring efforts conducted in nature-based outdoor recreation settings (i.e., forests, parks, and trails) since 2000.

Recreation Experience Opportunity Inventory Protocol

The recreation experience opportunity inventory was conducted systematically, following specific protocol to ensure consistency in data compilation, analysis and reporting. The inventory assesses previously conducted research and monitoring studies; thus no new data were collected for this inventory.

The recreation experience opportunity inventory tasks were to:

- Establish a recreation experience opportunity inventory protocol,
- Select recreation experience opportunity and sociodemographic attributes for analysis,
- Compile recreation, monitoring and sociodemographic reports conducted in the state since 2000,
- Organize data by county and regions, and
- Assess recreation research, monitoring studies, and sociodemographic data to identify county, regional, and state differences.

The recreation experience opportunity inventory protocol is based on a review of relevant recreation literature and planning documents and responds to the framework objectives outlined by the Minnesota Legislature. Multiple attributes were selected to embody Minnesota's population diversity and the range of recreation opportunities available (Appendix 1). U.S. Census, Minnesota Demographic Center, and recreation research and monitoring reports were obtained through an intensive literature review and in collaboration with state and local officials and stakeholders. Data associated with the selected attributes were analyzed to identify reported frequencies or population proportions at the county, regional and state level (where available) and the magnitude of differences (positive or negative) in frequencies or proportions where available (e.g., population densities, median household income, recreation activity participation). Of specific interest were differences between (1) the counties and the region overall, (2) the counties and the state overall, and (3) the region and the state overall. For site-specific recreation studies, data were analyzed to determine reported recreation activity participation, experiences sought and/or attained, and problems encountered by respondents.

Northwest Region Profile

The Northwest Region consists of 24 counties (see Appendix 2; Figure 2.1). In the Northwest Region a total of seven recreation experience opportunity studies conducted since 2000 were available for analysis: two region-wide studies and five site-specific studies (see Appendix 3 for list of studies and sites).

Sociodemographics

Population Size and Density

In 2009, the population of the Northwest Region was approximately 448,000 people and accounted for approximately 9 percent of Minnesota's population (Appendix 4). Population projections, using 2005 population statistics, predict that by 2035 the Northwest region will grow by 17 percent but will account for slightly less than Minnesota's overall population (8%). The counties with the highest projected growth are Beltrami, Douglas, and Becker. In contrast, Kittson and Traverse Counties are projected to experience a decline in their populations by more than 20 percent.

The population density of the Northwest Region (17.1 persons per square mile) is considerably less than that of the state overall (61.8 persons per square mile; Table 2). Douglas, Clay and Ottertail Counties have the highest population densities in the Region. Lake of the Woods, Kittson and Marshall Counties have the lowest population densities.

Age and Gender

In general, the population of the Northwest Region is older than that of Minnesota as a whole. All of the counties in the region have a greater proportion of older residents (residents 65 years of age or older) than the state overall. The counties with the greatest proportion of older residents are Traverse, Grant and Kittson (Table 2). Similarly, the Northwest Region has a smaller proportion of younger residents (residents under 18 years of age) than Minnesota overall. Stevens, Lake of the Woods and Traverse Counties have the lowest percentage of younger residents, while Mahnomen, Roseau and Beltrami have the highest percentage—slightly higher than the Northwest Region and the state as a whole. Gender does not vary significantly between the counties and the Northwest Region or the state. Minnesota's proportion of female residents overall is 50.2 percent.

Table 1
Projected Minnesota Northwest Region Population by County, 2005 to 2035

County	2005 Estimate	2035 Projection	% Change 2005-2035
Becker	32,203	40,790	26.7

Minnesota	5,192,122	6,446,270	24.2

Note: Cell shading indicates the 3 biggest positive (dark) and negative (light) differences.
 Minnesota State Demographic Center (2007)

Median Household Income

The median household income in the Northwest Region is about 23 percent less than the median household income in Minnesota overall. Clay, Roseau and Marshall Counties have higher median incomes than the Northwest Region overall. Clearwater, Mahnommen, and Wadena Counties have the biggest gap in median incomes when compared to the region and state incomes (Table 2).

Table 2

Race and Ethnicity

Nine of ten (89%) Minnesotans are white. Similarly, the percentage of white residents in the Northwest Region is equal to or exceeds Minnesota percentages overall in 19 of 24 counties. However, 14 counties in the Northwest Region have higher proportions of American Indian or Alaska Native residents than the state. Mahnomen, Beltrami, Cass, and Clearwater Counties have the highest proportion of American Indian or Alaska Native residents in the region. The Northwest Region overall has a smaller proportion of black, Asian, and Hispanic or Latino residents than the state. The counties that have a greater proportion of Hispanic/Latino residents than the state are Polk, Todd, Norman and Marshall.

Table 3
Differences between Northwest Counties and the Northwest Region/State Overall in Race and Ethnicity

Note: Cell shading indicates the 3 biggest positive (dark) and negative (light) differences in each column. U.S. Census Data (2008)

Participation in Recreation Activities

According to a recent state-wide recreation participation study (Kelly, 2005a), the recreation activities Northwest Region residents most frequently participate in are walking or hiking, boating, swimming and driving for pleasure, which parallel state-wide participation figures (Table 4). However, Northwest Region residents participate to a greater extent than state residents overall in hunting, all-terrain vehicle driving, and snowmobiling. Northwest Region residents are less likely to participate than state residents as a whole in biking, running or jogging, or ice skating/hockey outdoors.

Table 4
Recreation Activity Participation by Northwest Region and State

Activity	Northwest (%)	Statewide (%)	Difference (%)
Walking/hiking	48	54	-6.0
Boating of all types, including fishing from a boat	43	43	0.0
Swimming or wading (all places)	37	41	-4.0
Driving for pleasure on scenic roads or in a park	40	37	3.0
Picnicking	34	36	-2.0
Fishing of all types	35	30	5.0
Biking (bicycling of all types, including mountain biking)	19	29	-10.0
Camping of all types	30	26	4.0
Visiting nature centers	19	25	-6.0
Nature observation of all types (e.g., viewing, identifying)	20	24	-4.0
Golfing	19	24	-5.0
Outdoor field sports (e.g., soccer, softball/baseball, football)	21	21	0.0
Visiting historic or archaeological sites	17	21	-4.0
Sledding and snow tubing	15	18	-3.0
Outdoor court sports (e.g., volleyball, basketball, tennis)	15	18	-3.0
Hunting of all types	23	16	7.0
Running or jogging	6	14	-8.0
Ice skating/hockey outdoors	5	12	-7.0
Inline skating, rollerblading, roller skating, roller skiing	6	11	-5.0
Off-road ATV driving	17	10	7.0
Snowmobiling	16	10	6.0
Downhill skiing/snowboarding	3	9	-6.0
Gather mushrooms, berries, or other wild foods	11	9	2.0
Cross country skiing	4	7	-3.0
Horseback riding	3	5	-2.0
Snowshoeing	2	4	-2.0

Note: Cell shading indicates the 3 biggest positive (dark) and negative (light) differences in each column. Kelly, T. (2005a). Data based on population 20 years of age and older

Recreation activities such as walking and hiking were reported by visitors surveyed at the Paul Bunyan Trail, Heartland Trail, Soo Line Trail, Foot Hills Forest Area, and Land O’Lakes State Forest. (Kelly, 2009a, 2009b). Fishing was reported at four of the five sites. Respondents reported camping, off-highway vehicle (ATV, OHM and/or ORV) riding, and wildlife viewing at three of the five sites. Inline skating, road biking, snowmobiling, mountain biking, and hunting were reported at two of the five sites. Finally, cross-country skiing and horseback riding were reported at one site.

Table 5
Recreation Activity Participation Documented at Recreation Sites in the Northwest Region

Activity	Trail			Forest	
	Paul Bunyan Trail	Heartland Trail	Soo Line Trail	Foot Hills Forest Area	Land O’Lakes State Forest
Hiking	x	x	x	x	x
Walking	x	x	x	x	x
Inline skating	x	x			
Road biking	x	x			
Snowmobiling	x	x			
Fishing	x	x		x	x
Camping	x	x		x	
Mountain biking	x	x			
Cross-country skiing		x			
Horseback riding		x			
OHV riding			x	x	x
Wildlife viewing			x	x	x
Hunting				x	x

Note: Five most frequently reported recreation activities respondents participated in at each site (more than five activities presented represent ties among activities).
 Kelly, T. (2009a, 2009b)

Nature-Based Tourism in the Northwest Region

A 2008 nature-based tourism study indicates 7.8 million person-visits to the North Central/West Region¹ from June 2007-May 2008 (Davidson-Peterson, 2008). Half of these visitors are Minnesota residents (49%), with the largest segments coming from the Fargo-Valley City area (32%) and the Minneapolis/St. Paul area (31%). One of five visitors visited a state or national park and one of ten overnight visitors stayed at campgrounds. Almost three-quarters (71%) of visitors indicated participating in one or more recreation activity. The most common activities were fishing (28%), pool swimming (23%) and lake/river swimming (20%; Table 6).

Table 6
Recreation Participation amongst travelers to the Northwest/Central Region of Minnesota, 2005-2008

Activity	% Recreation Participation
Fishing	28
Pool swimming	23
Lake/river swimming	20
Motor boating/water skiing	16
Golfing	14
Hiking	13
Biking	11
Wildlife viewing or bird watching	11
Canoeing	7
Jet skiing	6
Off-road all-terrain vehicle driving	4
Downhill skiing or snowboarding	2
Hunting	2
Ice Fishing	2
Snowmobiling	2
Cross-country skiing	1

Note: Davidson-Peterson (2008)

¹ The North Central/West Region comprises all of the counties in the Northwest Region except Traverse and in addition to Benton, Crow Wing, Mille Lacs, Morrison, Sherburne and Stearns.

Recreation Experiences

Recreation Experience Motivations

A 2008 trail study revealed that statewide, Minnesota’s recreation trail users are primarily motivated by aesthetics, physical exercise and escape (Schneider, Schuweiler, & Bipes, 2009). While motivations across the state were similar, some regional differences were noted. Northwest trail users identified the attributes, “to be on my own” and “to experience silence and quiet” as more important than statewide trail users (Table 7). Meanwhile, “to enjoy different experiences from home” and “to challenge myself” were less important to Northwest trail users compared with statewide trail users.

Table 7
Differences between Northwest Region and Statewide Trail Users in Experiences Sought

Reasons for participating	Average Importance ^a among Trail Users ^b		
	Northwest (n ≥ 460)	State (n ≥ 3023)	Difference
To view the scenery	4.29	4.26	0.03
To be close to nature	4.22	4.19	0.03
To be physically active	4.22	4.15	0.07
To get away from the usual demands of life	4.18	4.19	-0.01
To experience nature	4.18	4.15	0.03
To explore and discover new things	4.01	4.06	-0.05
To get/keep physically fit	3.99	3.90	0.09
To relax physically	3.97	3.92	0.05
To do something with my family	3.94	3.90	0.04
To rest mentally	3.77	3.71	0.06
To experience solitude	3.75	3.65	0.1
To enjoy different experiences from home	3.73	3.81	-0.08
To be w/people who enjoy the same things I do	3.67	3.70	-0.03
To experience silence & quiet	3.61	3.50	0.11
To be on my own	3.42	3.26	0.16
To challenge myself	3.36	3.43	-0.07
To be with members of my own group	3.29	3.33	-0.04
To have thrills & excitement	3.21	3.26	-0.05
To test my skills & abilities	3.13	3.19	-0.06
To be away from other people	3.11	3.06	0.05

^aBased on respondents rating experiences on a scale with 1=very unimportant, 2=unimportant, 3=neither, 4=important, 5=very important. ^bNine types of trail users surveyed include: All-terrain vehicle riders, bikers, cross-country skiers, horseback riders, off-highway vehicle riders, off-road vehicle riders, snowmobilers, runners, and walkers/hikers.

Note: Cell shading indicates the 3 biggest positive (dark) and negative (light) differences between the region and the state. Schneider et al. (2009)

Site-specific recreation experience data were limited to two State Forest areas (Kelly, 2009b). The five most frequently sought recreation experiences at the two forest locations included nature viewing, peace and quiet, being with family and friends, getting away, as well as rest and relaxation (Table 8).

Table 8
Experiences Sought at Recreation Sites in the Northwest Region

Recreation experience sought	Forest	
	Foot Hills Forest Area	Land O'Lakes State Forest
Nature viewing	x	x
Peace & quiet	x	x
Family & friends	x	x
Get away	x	x
Rest & relaxation	x	x
Exploration		x

Note: Five most frequently reported experiences respondents sought at each site (more than five activities presented represent ties among activities).

Kelly, T. (2009b)

Problems or Constraints Encountered

Among Minnesota recreation trail users, conflicts happen infrequently, but when they do occur they most often originate with the signs or sounds of other visitors (Schneider et al., 2009). Trail users in the Northwest rated the frequency of encountering conflicts similarly to statewide trail users. The greatest regional differences are that Northwest trail users less frequently reported “hearing other users on the trail,” “seeing evidence of off trail/road use,” and “others not yielding” (Table 9).

At the four sites with data on recreation problems, a variety of issues emerged (Table 10). Differences in problems encountered varied whether the resource was a trail or a forest area. Notably, where respondents could choose “no problems encountered”, the vast majority of respondents did so (Paul Bunyan Trail: 90% no problem, Heartland Trail: 91% no problem).

Table 9
Differences between Northwest Region and Statewide Trail Users in Sources of Recreation Conflict

Source of Conflict	Average Frequency of Conflict ^a among Trail Users ^b		
	Northwest (n ≥ 404)	State (n ≥ 2697)	Difference
Hearing other users on the trail	0.94	1.01	-0.07
Litter on or near the trail	0.87	0.85	0.02
Seeing evidence of off trail / road use	0.80	0.87	-0.07
Seeing off trail / road use	0.74	0.74	0.00
Others going too fast	0.55	0.56	-0.01
Rude or discourteous users	0.45	0.49	-0.04
Accessibility issue	0.43	0.43	0.00
Others passing too closely	0.41	0.46	-0.05
Too many others on the trail	0.40	0.46	-0.06
Others not yielding	0.39	0.46	-0.07
Others out of control	0.35	0.37	-0.02

^aBased on respondents rating sources on a scale of 0-3 with 0=Never, 1=Sometimes, 2=Many Times, 3=Almost Always. ^bNine types of trail users: All-terrain vehicle riders, bikers, cross-country skiers, horseback riders, off-highway vehicle riders, off-road vehicle riders, snowmobilers, and walkers/hikers.

Note: Cell shading indicates the 1 positive (dark) and 3 biggest negative (light) differences.

Schneider et al. (2009)

Table 10
Problems Encountered at Recreation Sites in the Northwest Region

Problems Encountered	Trail		Forest	
	Paul Bunyan Trail	Heartland Trail	Foot Hills Forest Area	Land O'Lakes State Forest
No Problems Encountered (%)	90	91	n/a	n/a
Other trail users blocking traffic/ not keeping right	x	x		
Other trail users passing without warning	x	x		
Irresponsible/unsafe behavior by others	x		x	
Other people's pets	x			
Unfriendly/discourteous behavior		x	x	
Feelings of insecurity or concerns about personal safety		x		
Other trail users going too fast		x		
Environmental effects from recreation			x	x
Lack of access to toilet facilities/ drinking water			x	x
Lack of on-site visitor information			x	x
Litter				x
Negative effects from logging activities				x

Five most frequently reported problems respondents encountered at each site (more than five activities presented represent ties among activities).

Kelly, T. (2009)

In response to problems or conflicts, statewide trail users utilize a variety of responses, but most frequently “follow rules for trail etiquette” (Schneider et al., 2009). Similarly, in the Northwest Region, trail participants use a variety of responses when they encounter recreation conflict (Table 11). The largest regional differences in responses to conflict are that Northwest trail users are more likely to “plan to avoid the area on my next visit,” and less likely to “wish the situation would go away or be over with” than statewide trail users.

Table 11
Differences between Northwest Region and Statewide Trail Users in Response to Recreation Conflict

Response	Response to Conflict ^a among Trail Users ^b		
	Northwest (n ≥ 216)	State (n ≥ 1491)	Difference
Follow establish rules for trail etiquette	2.31	2.45	-0.14
Talk to other members of my group about the incident	1.76	1.87	-0.11
Don't let it get to me; refuse to think about it too much	1.59	1.72	-0.13
Refuse to get too serious about it	1.59	1.71	-0.12
Try not to burn bridges	1.46	1.49	-0.03
Go on as if nothing had happened	1.41	1.48	-0.07
Think about why the incident occurred	1.40	1.49	-0.09
Try to forget the whole thing	1.34	1.42	-0.08
Wish the situation would go away or be over with	1.31	1.50	-0.19
I try to keep my feelings to myself	1.30	1.35	-0.05
I know what has to be done so I double my efforts to make it work	1.22	1.22	0.00
Make light of the situation	1.21	1.25	-0.04
I make a plan of action and follow it	1.14	1.09	0.05
Come up with a couple of different solutions	1.06	1.02	0.04
Talk to area personnel about the incident	1.02	1.00	0.02
Leave the area and to a different part of the area	1.02	0.98	0.04
Plan to avoid the area on my next visit	1.01	0.89	0.12
Alter my pace to avoid others	0.94	0.98	-0.04
Change the time I will use the trail next time	0.91	0.85	0.06
Keep others from knowing how bad things were	0.86	0.82	0.04
Stand my ground and fight for what I wanted	0.81	0.79	0.02
Try to get the person responsible to change their mind	0.76	0.71	0.05
Leave the area altogether	0.75	0.68	0.07
Express anger to the person who caused the incident	0.58	0.61	-0.03

^aBased on respondents rating responses on a scale of 0-3 with 0=Do not use, 1=Use infrequently, 2=Use occasionally, 3=Use frequently.

^bEight types of trail users: All-terrain vehicle riders, bikers, cross-country skiers, horseback riders, off-highway vehicle riders, snowmobilers, and walkers/hikers.

Note: Cell shading indicates the 3 biggest positive (dark) and negative (light) differences. Schneider et al. (2009)

To experience silence & quiet	39.5	35.7	3.8
To experience solitude	51.2	53.3	-2.1
To have thrills & excitement	65.1	62.4	2.7
To rest mentally	55.8	54.6	1.2
To experience nature	73.8	84.7	-10.9
To be w/people who enjoy the same things I do	76.7	75.3	1.4
To challenge myself	46.5	39.7	6.8
To test my skills & abilities	39.5	32.7	6.8
To explore and discover new things	74.4	79.8	-5.4
To do something with my family	86.0	79.5	6.5
To get/keep physically fit	58.1	50.2	7.9
To be physically active	72.1	67.3	4.8
To be with members of my own group	65.1	68.1	-3.0
To enjoy different experiences from home	72.1	73.0	-0.9

Schneider et al. (2009)

Table 5.8
Reasons for walking/hiking

Reasons for participating	Identified as Important or Very Important		
	% Northwest (n ≥ 55)	% Statewide (n ≥ 431)	% Difference
To be on my own	54.5	43.2	11.3
To be away from other people	45.5	34.4	11.1
To be close to nature	98.2	89.9	8.3
To get away from the usual demands of life	87.3	79.8	7.5
To relax physically	85.5	80.6	4.9
To view the scenery	96.4	91.7	4.7
To experience silence & quiet	70.9	66.7	4.2
To experience solitude	67.3	64.1	3.2
To have thrills & excitement	21.8	18.8	3.0
To rest mentally	74.5	71.8	2.7
To experience nature	89.1	88.3	0.8
To be w/people who enjoy the same things I do	49.1	48.3	0.8
To challenge myself	34.5	34.2	0.3
To test my skills & abilities	23.6	23.9	-0.3
To explore and discover new things	72.7	73.2	-0.5
To do something with my family	69.1	70.1	-1.0
To get/keep physically fit	85.5	87.2	-1.7
To be physically active	90.9	94.0	-3.1
To be with members of my own group	25.5	28.8	-3.3
To enjoy different experiences from home	56.4	65.4	-9.0

Schneider et al. (2009)

Appendix 7

Table 7.1
Use of coping strategies among all-terrain vehicle riders who experience interference

Coping Strategy	Used Strategy		
	% Northwest (n ≥ 6)	% Statewide (n ≥ 58)	% Difference
Change the time I will walk next time	13.3	18.2	-4.9
Alter my pace to avoid others	13.3	22.3	-9.0
Plan to avoid the area on my next visit	31.1	20.1	11.0
Talk to area personnel about the incident	26.7	26.1	0.6
Try not to burn bridges	33.3	32.4	0.9
Stand my ground and fight for what I wanted	28.9	24.5	4.4
Think about why the incident occurred	31.1	31.1	0.0
I make a plan of action and follow it	31.1	29.6	1.5
I know what has to be done so I double my efforts to make it work	28.9	30.8	-1.9
Make light of the situation	24.4	29.2	-4.8
Keep others from knowing how bad things were	17.8	23.9	-6.1
Try to get the person responsible to change their mind	28.9	25.5	3.4
Don't let it get to me; refuse to think about it too much	26.7	31.8	-5.1
Come up with a couple of different solutions	28.9	28.6	0.3
Leave the area altogether	24.4	20.1	4.3
I try to keep my feelings to myself	20.0	29.2	-9.2
Leave the area and go to a different part of the area	33.3	25.5	7.8
Express anger to the person who caused the incident	15.6	19.5	-3.9
Wish the situation would go away or be over with	31.1	30.8	0.3
Talk to other members of my group about the incident	33.3	36.5	-3.2
Try to forget the whole thing	24.4	27.4	-3.0
Refuse to get too serious about it	26.7	32.1	-5.4
Follow established rules for trail etiquette	40.0	43.4	-3.4
Go on as if nothing had happened	17.8	27.4	-9.6

Schneider et al. (2009)
